“DIRTBUSTER” Radiators

For Truck, Farm, Feedlot & Industrial Applications

Built to stay cool in dirty conditions!

Our "DIRT BUSTER" line of radiator and charge air coolers are designed with dirty conditions in mind. Having cooling problems because of dirt and debris continuously plugging your radiator? No matter if it's construction, agriculture, oil field, feedlot or silage equipment we can help you design a system that is right for you. We have designed these radiators and charge air coolers to keep the air flowing while minimizing dirt and debris buildup in the fins and tubes.

We can build a "DIRT BUSTER" core for your existing copper and brass radiator and have designed and built complete "DIRT BUSTER" radiators to replace existing plastic and aluminum radiator applications.

Give us a call at (701)-663-7896 and let our design team go to work on Your application!
